First sentence. Second sentence. Third sentence. Fourth sentence.

1 Introduction

- Odd numbers => Tea first
- Even numbers => Milk first
- Measurement => $\frac{1}{4}$ Tea per cup, 1 tablespoon of milk per cup
- Tea was steeped with 1 tea bag in 8 ounces of water for 4 minutes

2 Experiment Challenges

- Temperature of Tea ** Approach => Pour tea to all cups from the same pot ** 16 oz measuring cup, 2 oz of tea in each cup
- Accuracy of measurement ** Human Error
- Miscommunication of how many cups per group ** We did not communicate to the participant that 4 cups were milk first, and 4 cups were tea first
